

You have **two seconds** to find out how good your crash repair is...

Unfortunately accidents happen and when they do the way your safety systems deploy is timed in fractions of a second and in a particular sequence. From crumple zones to seat belt tensioners to airbags. If your car has not been repaired to pre-accident condition then your future safety may be compromised.

You can be assured that Vauxhall technicians are fully trained to the highest standard with the latest technology to assess and restore your Vauxhall to its original condition, using only genuine parts.

Always insist on an Approved Bodyshop and genuine parts.

If it's not repaired at a Vauxhall Approved Bodyshop can you really be sure?
